

**APPARATUS FOR CONTROLLING THE POSITION OF A SCREEN
POINTER THAT WIRELESSLY TRANSMITS COMPRESSED DATA**

Abstract of the Disclosure

5 An apparatus for controlling the position of a screen pointer includes a
movement sensor for sensing relative movement between the apparatus and a
surface, and generating corresponding movement data. The movement sensor is
configured to generate compressed data representing the movement data. The
apparatus includes a wireless transmitter for wirelessly transmitting the
10 compressed data.
